

BELIMO
ZoneTight™

New Belimo ZoneTight™ valves (PIQCV / 6-way EPIV) awarded for “Percorso Efficienza e Innovazione 2016”

Two Belimo products were awarded in this year's *Percorso Efficienza e Innovazione*, an initiative at MCE organized in collaboration with the Scientific Committee of the *Politecnico di Milano*, aimed at highlighting and awarding the best products presented in each MCE edition. The prestigious award was given to the PIQCV and the 6-way EPIV valves from the *Belimo ZoneTight™* product family.

The PIQCV (Pressure Independent Quick Compact Valve) is a compact control valve which permanently supplies all heating and cooling elements with precisely the amount of water needed, with an automatic and permanent hydraulic balancing despite differential pressure changes and in partial load operations. It allows flexible and fast installations, even in small spaces, thanks to its innovative design. It has a high energy efficiency thanks to the low differential pressure required and to the constant flow.

The electronic pressure-independent 6-way zone valve, instead, combines the function of two control and two shut-off 2-way valves, allowing the use of a single exchanger, with no need for a balance valve. Its innovative technology with integrated flow measurement and electronic flow control meets the needs of the highest design standards, secures the correct amount of water and eliminates any possible HVAC systems installation error.

The Scientific Committee stated that installing these two new valves would result in a reduction of the CO₂ production, because of the higher efficiency of the HVAC plant. Furthermore, the warranty of Belimo products and the capability to adapt the valve to the plant changes would drastically reduce the scrapping of installed valves & actuators.

This prize validates and crowns Belimo's ample investment in research and development: thanks to its products' innovation, efficiency and flexibility Belimo remains a world market leader company, with almost 40 years of experience.
